running out of print

THE VANISHING CULTURE OF NEWSPAPER STANDS IN SHANGHAI

LITERATURE

As the rise of digital reading gets globalized...

- Where are the printed magazines and newspapers?
- How are the publishers doing?
- Then, how are the new generations getting information?

- Due to the abandon of printed medium, many magazines and newspaper volumes were forced to shutdown
  - 《东南快报》
    - 1500k readers, daily publish rate up to 400k
  - From《海曙报》《海曙通讯》to《海曙新闻》
  - 《爱格》，《绘心》，《文艺风赏》
- Many choose to transition online
  - POPEYE
  - 《联合文学》
  - Even though they are online, they remain the format like physical magazines

WHY?

- **Process of printing newspapers is slow and inconvenient**
  - At the time, posts on the internet had already 100k views
  - With social media, we see news in seconds, through video, posts, etc.
- **Audience**
  - China’s internet users reached 1.067 billion people
  - Newspapers, like television, are mostly for older generation
- **Economic Concerns**
  - Newspaper publishing earns from the advertisements
  - However, advertisements have moved online too

PSYCHOLOGY

- **Problem for the elderly**
  - Social media and online platforms are now the main way people receive information
  - Many can’t adapt to this lifestyle because of **technological barriers**
  - Their children have their own responsibilities to take care of, and can’t always accompany or care for them
  - Need a suitable social environment and suitable way to connect

- **The Dead Cycle caused by changes in the media era...**
  -> Lack of social activities
  -> Lose sense of direction and purpose of life
  -> Feelings of loneliness, depression, and anxiety
  -> Minimized enthusiasm and desire to socialize

WHY AREN'T THEY WILLING TO "FIT IN"?

- **Arduous and Time Consuming**
  - A burden to be experts in many things
  - Pressure and stress

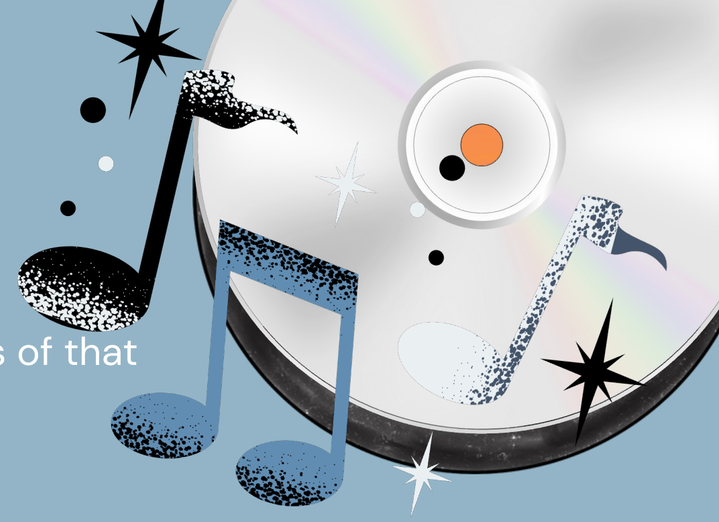

- **Social Responsibility Concerns**
  - Worry that online shopping takes business from local shops
  - Worry that if they don't go into the bank or the post office, it may close down and people will lose their jobs
  - Research by Lancaster University: "Why some older people are rejecting digital technologies"

- **Social Isolation**
  - "The efficiency gained by conducting online interactions is not a powerful motivator for technology adoption by older adults who may be experiencing loneliness and isolation."
    - Vicki Hanson, a visiting professor at Lancaster University
  - Replaces reality/ in-person interactions between people

THE MUSIC

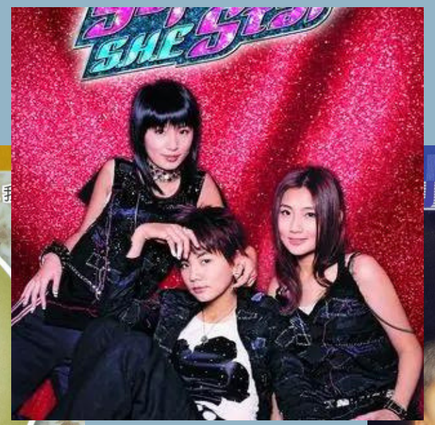

- **Bringing back the atmosphere**
  - Popular music from the paper media era is different from today's, and songs of that time have their own unique rhythm
  - To bring back the atmosphere, we will fill out stand with CDs and tapes
  - Play songs popular back then
  - Music and Display will **draw attention** to people on the street for our newsstand display
  - Helps advertise our project and increase influence

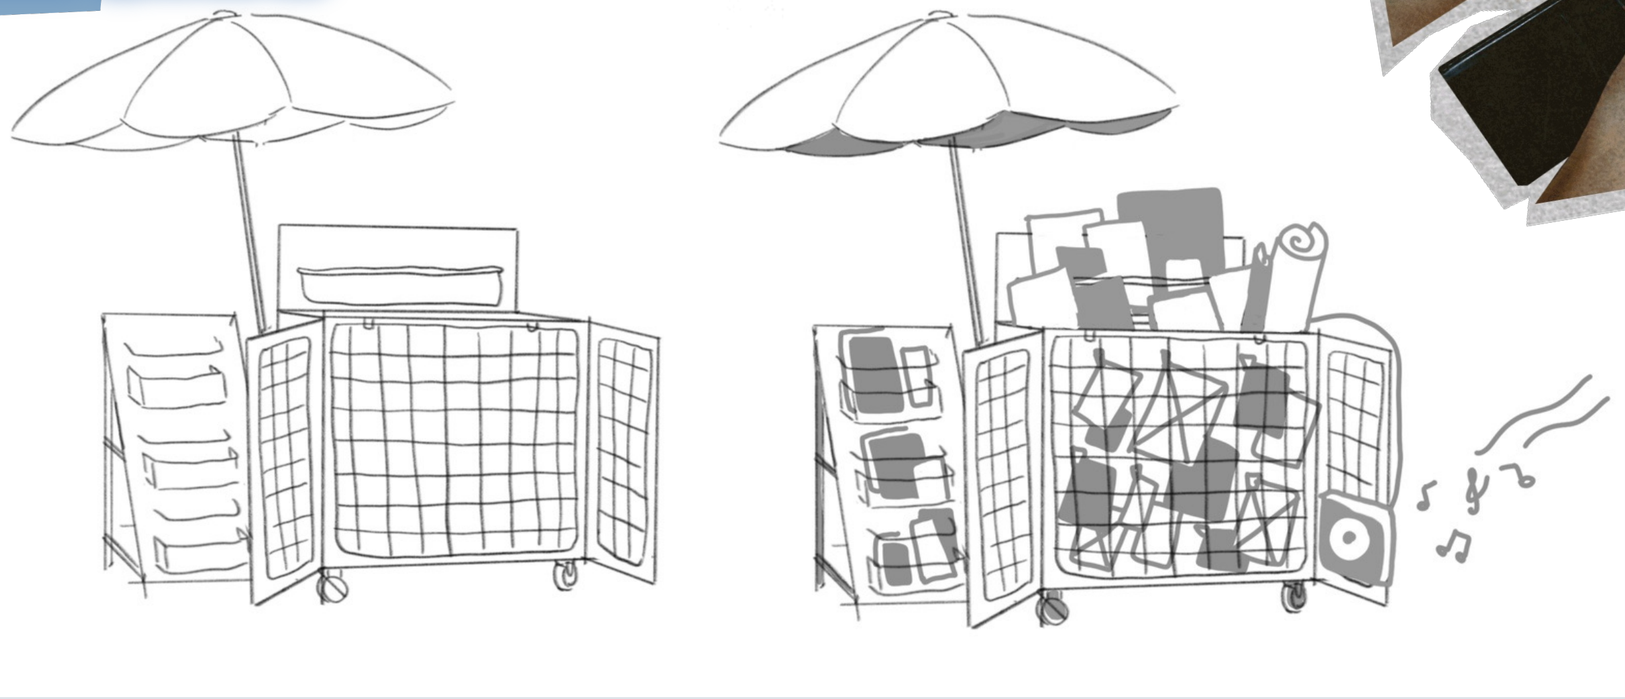

NEWS STAND DESIGN

- Replace the independent newsstand space with a cart
  - Easier to recreate and navigate around the city
  - Filled with old magazines, newspapers, posters, music players, etc. that were popular and sold back then
  - Expect to add instructional booklet on daily application usage
